Additional info

I love people and constant growth with joy, so I hope that we will be able to work together 🥳

Hanna Dzenis

Front-end Developer

Professional Summary

As a very energetic and hardworking person, I am **looking for** a company for **long-term cooperation**. My qualities, such as perfectionism and the **ability to learn fast**, help to do the job rapidly and efficiently. In addition, I am a **team player** with **good communication skills**, and also easily cope with work under pressure. I am **able to negotiate with other people**, so there are no problems with understatement or misunderstanding in projects and with clients.

I've also completed the **TeachMeSkills courses** on Front-end development.

To create websites and web applications, I use knowledge of **HTML/CSS**(sass, scss), CSS/Bootstrap **Grid, Bootstrap5, JavaScript, TypeScript, Node.js, React.js**, and **Redux.js**.

Experience & Projects

Immigration Specialist | Warsaw, Poland
Deloitte

Jan 2022
Jul 2022

- My job was to fully guide the client in obtaining legalizing documents. I collected a complete set of documents individually for each client and discussed every detail with him to find the most comfortable interaction.
- In this position, I received such irreplaceable skills as **problem solving**, the ability to effectively act as an **intermediary** between the client, department and manager. It was there that I learned to act coolly and prudently **under pressure** and to approach each task **creatively**.
- Furthermore, my knowledge of **MS Office**, the field of **law, taxes** and **legalization** has strengthened, and it also brought me the skill of working with a **large amount of documentation** and **clear** and **effective correspondence**.

Front-end Developer | Warsaw, Poland
Freelance

Oct 2022
Now

- I developed websites and landing pages in **HTML/CSS** and **JavaScript/Typescript/React**, adding various **DOM** elements and using the **BEM** methodology.
- Learned to work with the **Parcel** package collector, as well as with **Sass/Scss** preprocessors.
- Brought to a nice level **adaptive layout** in several variations.
- I applied contemporary technologies as **CSS** and **Bootstrap Grid, Bootstrap, Flexbox, positioning**, worked with **SVG**-type images, and diverse **animation** of elements.
- Worked in a **team** on a **common project** with other developers using the **GIT** version control system and **npm**.
